

# JKG 3<sup>rd</sup> plate and RFID solutions

- Custom designed for every application
- With or without RFID, printed on demand, with variable information
- State-of-the-art technology with many security features available
- Integration to databases with vehicle, biometric and other information
- Choice of technologies, RFID memory configurations, windscreen or on-plate.

SINCE 1843

The 3<sup>rd</sup> license plate, or windscreen tag, is a small "card" like adhesive tag, which is placed at the inside of the vehicle windscreen. As such it is not easy to remove from the vehicle and plays an important part to identify the vehicle, in combination with the normal license plate. Its size and safety features can vary as per customer demands.

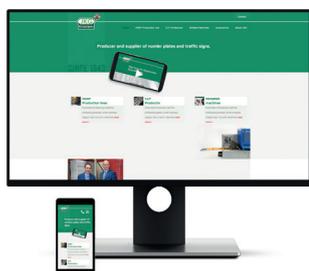

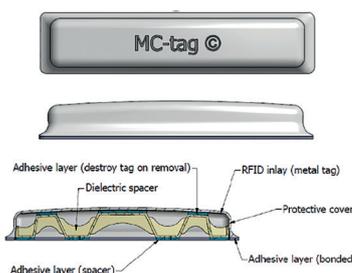

Typical applications for the 3<sup>rd</sup> plate sticker:

- Electronic Vehicle Registration
- Electronic Toll Collection
- Parking and Access Control
- Vehicle Emissions Inspection
- Fleet Management
- Vehicle tracking

## Safety features:

Depending on the required safety level, the 3<sup>rd</sup> plate can have several security features, such as Holographic protection with customer logos, non-removable non-transferrable, Tamper Evident feature, IR and UV light protection, Invisible UV security printing, Custom images and/or Variable printing and Custom Chip programming, Print & program secure data and/or barcodes on-demand, Unique access codes and Serial numbering.
